

## Section 719.12 – AG, Agricultural District

The Agricultural District encompasses the open areas of the township where farming, dairying, forestry operations, and other rural activities are located. Vacant land, fallow land, and wooded areas are also present and are often interspersed among farms. Gradually, portions of the Agricultural District may be converted into other land uses. The Agricultural District safeguards land essential for agricultural pursuits from encroachment by premature and unplanned residential, commercial, and industrial development.
