

## Section 719.109 – Noise

- A. The emission of measurable noises from the premises shall not exceed sixty-five (65) decibels as measured at the boundary property lines, except that where normal street traffic noises exceed sixty-five (65) decibels during such periods, the measurable noise emanating from premises may equal, but not exceed, such traffic noises. Within LI Districts, sound levels not exceeding 70 decibels may be permitted. Within HI Districts, sound levels not exceeding 75 decibels may be allowed.
- B. In addition, objectionable sounds of an intermittent nature, or characterized by high frequencies even if falling below the aforementioned decibel readings, shall be controlled so as not to become a nuisance to adjacent uses.
